Reliable Performance. Professional Results.

Introducing the SMART-32D Dual-Sided ID Card Printer—a compact, affordable solution designed to deliver fast, dependable printing and professional-quality credentials for everyday issuance.

A new multi-core CPU and 512 MB RAM support dual-sided printing speeds of up to 190 cards/hour (YMCKOK). Its compact, lightweight design, front-access card handling, and simple LED controls make everyday operation easy, with an optional two-line LCD for added convenience.

Automatic dual-sided printing streamlines card issuance, while a 300-card YMCKOK ribbon reduces changeovers for full-color front and black-back printing. Standard USB, built-in Ethernet, a multi-platform utility, and optional encoding simplify integration and support a wide range of credential applications.

Issuance

SMART IDesigner simplifies card design, issuance, and data management with your SMART-32D. Create customized credentials in minutes using intuitive tools for images, photos, text, and barcodes.

Advanced features include database connections, camera and signature-device plug-ins, and smart card reading and encoding with compatible optional encoders.

- Design and print (Image, Photo, and Text)
- 1D, 2D & QR Code Barcode printing
- Automatic portrait detection, sizing, & positioning
- Sequential number printing
- Card design templates
- Camera, scanner, and signature-pad plug-ins
- Convenient card issuance and data management
- Magnetic stripe, contact, and contactless encoding via compatible plug-ins

Security

The SMART series printers come with highly effective and tested physical and electronic security features.

- **PASSWORD** verification with administrator and user authentications
- **PC AUTHENTICATION** restricts printer use to an authorized PC
- **DATA ENCRYPTION** over USB & SSL (Secure Socket Layer) over Ethernet
- **KENSINGTON LOCK** available for added physical security
- **SNMPv3** support over Ethernet

Networking

Standard built-in Ethernet & USB connectivity make the SMART-32D easy to integrate into your issuance environment.

- **“Single-wire” printing and encoding** lets you print cards and encode magnetic stripes, contact chips, and contactless smart cards over your network when equipped with optional encoding modules.
- The **SMART Ethernet module** can be configured to accept “open card protocol” print commands for direct printing without a driver.
